Readily accessible data, such as travel or waste, is used to monitor wellbeing across the organisation.	Data or tools are monitored Carbon Reduction. Results are fed into the plan, do, review cycle for the organisation strategy.	Staff surveys (or formal/informal feedback for smaller organisations) are also used to monitor factors that are known to affect Carbon Reduction, such as

		increased time or burden. There is evidence of collaboration with expert support or analysis to obtain a deeper understanding of the data/trends.
